MOBILE DEVELOPER

Front-End Developer with solid knowledge in web and mobile application development using modern technologies. Focused on creating intuitive and efficient applications, using best practices in development and design. Committed to continuous improvement and the adoption of new technologies to offer innovative and high-quality solutions.

TECNOLOGIES:

- **Languages:** HTML, JavaScript, TypeScript.
- **Libraries/Frameworks:** ReactJS, React Native, NextJs.
- **Styling:** CSS/SCSS/SASS, TailwindCSS/NativewindCSS, Styled-Components.
- **State Managment:** Redux, Zustand, React Context.
- **API:** REST, GraphQL, Axios.
- **Version Control:** GIT, GitHub.
- **Devices:** IOS, Android.
- **Design:** Adobe Illustrator, Fusion 360.
- **Languages:** Spanish(C2), English(B1).

HABILITIES

- | | |
|-----------------------|--------------------------|
| • Communication | • Results orientation |
| • Proactivity | • Responsibility |
| • Creativity | • Team work |
| • Attention to detail | • Problem solving |
| • Adaptability | • Understanding capacity |

PROFESSIONAL EXPERIENCE

• **App Thoughts:** I developed an MVP for a client in the United States that consisted of creating an application that captures what the user says through Siri and stores it in a database. The app then displays the recorded thoughts in an organized list, allowing users to edit and create new thoughts. Additionally, it includes a search feature to filter and group thoughts by topics and keywords.

• **Tracking App:** I developed a delivery system application for washed clothes, which included a map and a list of manifests where their respective stops are loaded. When selecting a manifest, a route is created on the map using Radar and Google Maps for real-time tracking. I also developed a web platform with Next.js to upload manifests along with their associated stops.

Personal Projects with React Native | Freelancer | Jun 2022 - Present

• **RecipeApp:** Recipe application created in React Native with Expo from a RestAPI (TheMealDB) using TypeScript, Zustand, NativeWindCSS, React-Reanimated, Axios, ESLint, Prettier. Fully functional for iOS and Android.

• **Pokedex:** Pokedex created in React Native from a GraphQL API (PokeApi) using React Native CLI, combining TypeScript, Zustand, Styled-components, React-Reanimated.

• **Country Application:** Created an application with React Native that includes navigation and queries to a REST API to obtain country data. The application features an intuitive and user-friendly interface, enhancing information accessibility for users.

EDUCATION

• Self-taught Mobile Developer | Jun 2023 - Present

• Application Development Career | Coderhouse | Apr 2022 - Jun 2023

• High School Diploma in Tourism | Escuela Prov. N° 159 Provincia de Jujuy | Mar 2009 - Dec 2014
